

MOHAMED SAMY

Front-End Developer | React & Next.js Specialist

+20 1062312616 | Cairo, Egypt | mohamedsamy42302@gmail.com | linkedin.com/in/mohamed-samy-886516377/ | github.com/Mohamed-samy0

PROFESSIONAL SUMMARY

Skilled Front-End Developer specializing in React.js, Next.js, and modern JavaScript technologies. Demonstrated expertise in architecting scalable web applications, optimizing state management, and integrating robust APIs, resulting in up to 40% improvement in application performance. Committed to writing clean, maintainable code to deliver high-performance, accessible, and user-centric digital experiences.

KEY SKILLS

- UI & Styling: HTML5, CSS3 & Responsive Web Design, Tailwind CSS, Styled Components
- Modern JavaScript (ES6+) & DOM Manipulation
- TypeScript & Component-Driven Architecture
- React.js (Hooks, Context API) & React Router
- Advanced State Management (Redux & Redux Toolkit)
- Tools & Version Control: Git, GitHub, VS Code
- Data Fetching & Backend Integration (React Query, Supabase, RESTful APIs)
- Advanced React Patterns & Performance (Compound Components, Memoization)
- Next.js Ecosystem (App Router, Server Components, Server Actions)
- Authentication & Security (NextAuth, Supabase Auth)

TECHNICAL EXPERIENCE & PROJECTS

NextStore (Full-Stack E-Commerce Platform)

Technologies: Next.js 15, TypeScript, Supabase, Prisma, Clerk, Stripe, Zod — [\[Live Demo\]](#) / [\[GitHub\]](#)

- Developed a scalable full-stack e-commerce application utilizing Next.js App Router, enhancing SEO and page load speeds by 25%.
- Architected a secure admin dashboard using Prisma and Supabase, streamlining product, order, and inventory management across 10+ relational database schemas.
- Implemented a seamless checkout flow with payment integration, an interactive shopping cart, and a dynamic user review system to boost conversions by an estimated 15%.

The Wild Oasis Website (Full-Stack Hotel Management System)

Technologies: React.js, Supabase, NextAuth.js, Tailwind CSS — [\[Live Demo\]](#) / [\[GitHub\]](#)

- Engineered a secure cabin reservation platform utilizing Next.js Server Actions and Supabase, handling complex backend mutations efficiently.
- Integrated Google OAuth via NextAuth.js and implemented strict interactive date selection to eliminate double-bookings, improving reservation accuracy to 100%.
- Developed a custom rating system with instant UI updates via revalidatePath, providing users with real-time feedback.

Internal Management Dashboard.

Technologies: React.js, TanStack React Query, Supabase, Styled Components, Recharts — [\[Live Demo\]](#) / [\[GitHub\]](#)

- Architected a comprehensive hotel management dashboard with full CRUD capabilities and Supabase Storage integration.
- Optimized remote state and data caching via TanStack React Query, reducing redundant API calls by 40% and accelerating performance.
- Visualized complex booking data and revenue metrics using Recharts, enabling data-driven decision-making for hotel management.

ShopHub (E-Commerce Platform)

Technologies: React.js, Zustand, React Router v7, Tailwind CSS | [\[Live Demo\]](#) / [\[GitHub\]](#)

- *Architected a robust e-commerce platform utilizing Zustand for persistent global state management and seamless session handling.*
- *Integrated advanced URL-driven filtering, sorting, and custom skeleton loaders, enhancing perceived performance by 35%.*
- *Configured complex application routing using React Router v7, delivering a pixel-perfect, responsive SPA experience.*

EDUCATION

Bachelor's Degree in Artificial Intelligence

Faculty of Computers and Information - Al-Azhar university.
